

# Mediasite Join

## RECORD, STREAM & MANAGE VIDEO & WEB CONFERENCES

Unified Communication is how today's best teams, businesses and schools collaborate, exchange ideas and get things done. But too often great ideas, subject matter expertise and important details are forgotten or left behind when a video call or presentation ends. Mediasite Join automatically records, streams and manages everything said and shown so users can always refer back to important discussions, course materials, training details or missed meetings. Mediasite's secure and centralized video portal expands the reach and usefulness of your organization's day-to-day communication and collaboration tools.

### RECORD & STREAM ANY CALL

- Simply invite Mediasite Join to your video call or meeting
- Record multipoint H.323 calls with synchronized H.239 content
- Deliver the same interactive video experience to all mobile, laptop and computer users
- Deepen viewer engagement with polls, bookmarks, sharing, post-video surveys, related links and more

### NO-FUSS PUBLISHING

Apply smart routing rules to automatically upload recordings to the proper folders in your Mediasite Management Portal. Auto-publish content to:

- A secure Mediasite Showcase video portal
- Any LMS courses
- Other content management systems

### MANAGE ALL VIDEO

- Centrally store recorded video calls alongside all other enterprise video
- Apply content retention rules to efficiently manage video life cycles
- Guarantee only authorized users see content with role-based permissions
- Quickly touch up and repurpose videos with easy-to-use editing tools

### POWERFUL SEARCH & NAVIGATION

- Find any spoken word, phrase or slide text with Mediasite SmartSearch
- Quickly navigate videos with Mediasite-generated slide previews and chapters
- Auto-scan all audio transcripts and slide content to build a searchable metadata-rich video library

### TRACK USER ENGAGEMENT

- Track viewing activity for any recorded video call or user
- Identify viewer engagement with intensity maps highlighting most viewed segments
- See system-wide content viewership

### LIVE STREAMING

- Live streaming to Mediasite Video Platform
- Simultaneous streaming to social media and other video platforms using RTMP such as YouTube and Facebook

## CAPTURE & TRANSCODE

## PUBLISH

mediasite<sup>®</sup> video cloud OR mediasite<sup>®</sup> video platform

## DELIVER
